JOSHUA MIRANDA DATA SCIENTIST

+91-7738839044 — joshuamiranda2110@gmail.com — linkedin.com/in/joshua-miranda21 — github.com/JoshhMiranda — https://joshhmiranda.github.io/portfolio/

Skills

Languages Python, SQL, Java

Frameworks Langchain, LangGraph, Tensorflow, Keras, PyTorch

Packages pandas, numpy, scikit-learn, matplotlib, mlflow

Cloud Platforms GCP, AWS

Tools Docker, SQL Workbench, Tableau, PowerBI, Neo4J, Excel

Soft Skills Communication, Critical Thinking, Problem-Solving, Stakeholder Management

Data Science Data Preprocessing, Cleaning and Mining, Data Visualization, Data Interpretation and Storytelling, Classical Machine Learning, Statistics

Deep Learning Agentic AI, GANs, Transformers, Retrieval Augmented Generation (RAG), Parameter Efficient Fine-Tuning (PEFT), Computer Vision, NLP

Experience

Accenture Strategy and Consulting **Aug 2025 – Present**
Decision Science Analyst

- Led a team on a **ML based marketing analytics** project spanning **2 markets**, implementing, evaluating, and **deploying regression models into production** to recommend optimal SKUs for on-ground salesreps to pitch to customers, building the pipeline on **Azure** using **Azure Storage for data management**, **ADF for orchestration**, and **Databricks notebooks for data processing and model development**, while owning data cleaning, validation, post-deployment monitoring to ensure model performance.
- **Managed end-to-end client communication**, serving as the primary point of contact for KPI reporting, project updates, and deliverable timelines ensuring aligned stakeholder expectations
- Designed and implemented a **GCP based data engineering pipeline** using **Aecorsoft Data Integrator, GCS, BigQuery, and Cloud Composer**, automating weekly ingestion of 16 structured data files via **orchestrated DAGs** to reduce manual intervention, and **developed and validated business logic in BigQuery** to **compute the client's final market share metrics** accurately.
- **Conducted client discovery workshops** to translate business needs into technical requirements, and built a **Streamlit-based UI prototype**, with **three stakeholder-defined error classification categories**, to help users identify and correct ingestion errors, accelerating data validation workflows

Quantiphi Analytics Solution Pvt. Ltd **Aug 2022 – July 2025**
Machine Learning Engineer

- Developed an image archiving and retrieval system, reducing redundancy across **2 TB** of data with an image **deduplication pipeline**. Automated image captioning using Gemini Pro and built a deep learning-based face detection and recognition system for **70 individuals with tagging**. **Led a team of 5 data taggers** for data curation and validated tagging. Developed a **semantic search pipeline** and engineered an **image-to-image retrieval** system using embeddings for efficient content-based search.
- Developed and deployed a **production-grade**, bidirectional English-Arabic document translation solution during a 12-week engagement, owning **data collection, cleaning, preprocessing, model training, fine-tuning for domain-specific translations, and deployment** on Google Cloud Platform. Built custom scripts to preserve document and text alignment post-translation. Achieved a **BLEU score $>$46 and a line-by-line backtranslation score $>$0.9**.
- Deployed an end to end CNN based Deep Learning project for **detection and classification of brain tumors in MRI Scans** on **AWS** using **EC2, ECR, Elastic BeanStalk, Docker for containerization** and integrated **CI/CD pipelines using GitHub Actions** along with **MLFlow for model experimentation, versioning and tracking**
- Took ownership in GTM efforts for **designing solution architecture, scope, timelines and resource structure** for AI/ML projects, **closing deals worth $>$ USD 1M**

Ernst & Young LLP, **Dec 2021 – June 2022**
Business Consulting Intern

- Extracted and transformed data from client databases to build interactive Power BI dashboards, to track inventory levels of over **2,000 suppliers and 43,000 parts** and identify **production bottlenecks in supply chain** and identified key **KPIs** for informed decision-making
- Worked on SQL query optimization to **decrease execution time by over 30 seconds** and facilitated the implementation of a **Graph DB solution using Neo 4j**

Education

St. Xavier's College
Master of Science in Big Data Analytics: CGPA 9.81/10 *Aug 2020 – July 2022*
Bachelor of IT: CGPA 3.33/4 *June 2017 - Apr 2020*
